Gliding through rolling hills, farms and forests, large and small towns, the Brandywine, White Clay, and Red Clay Creeks, and Christina River constitute the watershed of the Christina River Basin, before continuing into the Delaware River. **This watershed provides more than 75% of the water supply for residents and businesses in New Castle County, Delaware.**

The Christina River Watershed Cleanup's mission has always been the removal of man-made debris from within this beautiful watershed, while raising public awareness for pollution prevention.

Join **hundreds of volunteers** and help clean the single most important natural resource in our region! A solid effort is needed each year to keep each of these waterways as free from debris as possible while also improving wildlife habitat.
